Electrical Characteristics

Testing Remarks	<ol style="list-style-type: none"> 1. Please disconnect input AC power supply before adjusting the output current via the DIP switch; make sure to use the DIP switch on the condition that the driver is unpowered. 2. The PC cover, casing and end cap for assembling the LED driver in the light fixture must meet the fire rating of UL94-V0 or above. 3. Pay attention to keeping the driver away from water, moisture and ESD during application. 4. In order to avoid any abnormalities during driver's application, pay attention that the PCB be insulated from the metal parts of casing.
