

### Features

- 3 versions selectable: non-dimmable, 3-in-1 dimming & 3-in-1 dimming + 12V AUX output
- High efficiency up to 96%
- THD <15%
- Output current adjustable via potentiometer
- Dim to off
- Surge protection: L-N: 6kV & L/N-GND: 6kV
- Flicker free; IP67
- Open circuit protection / short circuit protection
- Suitable for Class I light fixtures

### Applications

· Shoebox light · highbay light · flood light · wall light

### Descriptions

LF-FDX320 is a constant current LED driver featuring super-high efficiency, high PF and low THD. It has 3 selectable versions: non-dimmable, 3-in-1 dimming and 3-in-1 dimming + 12V AUX output. There is a potentiometer on the top of LED driver which is used to adjust the output current (power). Besides, it complies with the latest European ERP standard and North American DLC standard.

### Product Model

LF - FD A / B / C 320

- 320: output power: 320W
- C: 3-in-1 dimming
- B: non-dimmable
- A: 3-in-1 dimming + 12V
- F: non-isolated design; D: serial number

■ **Electrical Characteristics**

<b>Additional Remarks</b>	<ol style="list-style-type: none"> <li>1. It is recommended that user install over voltage protection, under voltage protection and surge protection devices in the power supply circuits of light fixtures to ensure electricity safety.</li> <li>2. The PC cover, casing and end cap for assembling the LED driver in the light fixture must meet the fire rating of UL94-V0 or above.</li> <li>3. The LED driver used in combination with the end device is one of the accessories of the whole light fixture, and the EMC of the whole light fixture is not only susceptible to the driver itself, but to the LED light fixture and the whole light fixture's wiring. Thus, the manufacturer of LED light fixture should re-confirm the EMC of the whole light fixture before the whole light fixture is finished.</li> <li>4. It is suggested that user use a slotted screwdriver or a Philips to adjust the output current of LED driver in case that the potentiometer is damaged (the screwdriver should have good insulation at the head, body and handle, and the screwdriver with a 2mm head is recommended as well; what's more, please pay attention that the intensity of torque not exceed 500g.cm).</li> <li>5. When using the LED driver, please pay attention that the total output power not exceed the maximum rated output power, otherwise the warranty service of LED driver would be failed.</li> <li>6. When conducting withstanding voltage test on LED driver, please short-circuit the input wire L and N; the positive electrode and negative electrode of the output wire; the positive electrode and negative electrode of the dimming wire and AUX power supply.</li> <li>7. Please fully inspect the withstanding voltage ability of LEDs and aluminum substrates and the value shall be &gt;2.5kVac.</li> <li>8. Lifud reserves the right to interpret any of the above parameters.</li> </ol>

Dimming Curve

Input: 230Vac; output: 213Vdc/1500mA (this data is measured by resistance dimmer and the chart is for reference only)

Dim-to-off “Without Afterglow” Operation

when the dimming signal is 0V, the LED driver has no output, but there exists junction capacitance between the aluminum substrate’s copper foil and the grounding wire, which will make the LEDs glow slightly. Thus, it is necessary to respectively attach a resistor to every node of LED beads in parallel, and the resistance should match for the parameters of aluminum substrate and LEDs. (reference resistance: 3-5KΩ/size: 1206)

■ **Transportation & Storage**

**1. Transportation**

- Suitable transportation means: vehicles, boats and aeroplanes.
- In transit, it is necessary to prepare awnings for rain or sun protection. Moreover, please keep civilized loading and unloading to prevent the vibration or impact of LED driver as much as possible.

**2. Storage**

- The storage of LED driver shall conform to the standard of Class I environment. When using LED drivers which have been stored for more than 6 months, please re-test them firstly. Do not use them unless they are tested to be qualified.

**Cautions**

- Please use Lifud LED driver according to its parameters in the specification, otherwise the LED driver may malfunction.
- Using any incompatible light fixtures or those that have not been certified may cause fire, explosion or other risks.
- Man-made damage is beyond the scope of Lifud warranty service.
